Journal of Neuroimmunology

Author Index (Vol. 70)

Altmann, D.M., see Elliott, J.I. (70) 139
Avissar, S. and Schreiber, G.
Measurement of early events in signal transduction beyond receptors involving G proteins function in mononuclear leucocytes (70) 81

Bai, Y., see Carlson, C.D. (70) 181
Berman, J.W., see Cuff, C.A. (70) 21
Blalock, J.E., see Galin, F.S. (70) 15
Brosnan, C.F., see Cuff, C.A. (70) 21

Cai, J.-P., see Hudson, S.J. (70) 199
Carlson, C.D., Bai, Y., Ding, M., Jonakait, G.M. and Hart, R.P.
Interleukin-1 involvement in the induction of leukemia inhibitory factor mRNA expression following axotomy of sympathetic ganglia (70) 181
Castellano, B., see Dalmau, I. (70) 123
Chalmers, D.T., see Lovenberg, T.W. (70) 113
Chin, Y.-H., see Hudson, S.J. (70) 199
Chou, R.C., see Ignatowski, T.A. (70) 55
Clevenger, W., see Lovenberg, T.W. (70) 113
Cocuzza, C., see Nicoletti, F. (70) 87
Crockard, A.D., Treacy, M.T., Droogan, A.G. and Hawkins, S.A.
Methylprednisolone attenuates interferon-β induced expression of HLA-DR on monocytes (70) 29
Crowe, P.D., see Lovenberg, T.W. (70) 113
Csurhes, P.A., see Pender, M.P. (70) 65
Cuff, C.A., Martiney, J.A., Berman, J.W. and Brosnan, C.F.
Differential effects of transforming growth factor-β1 on interleukin-1-induced cellular inflammation and vascular permeability in the rabbit retina (70) 21

Dalmau, I., Castellano, B., Pedersen, E.B., Finsen, B., Zimmer, J. and González, B.
Reduction of the microglial cell number in rat primary glial cell cultures by exogenous addition of dibutyryl cyclic adenosine monophosphate (70) 123
De Souza, E.B., see Lovenberg, T.W. (70) 113
Dijkstra, C.D., see Van der Laan, L.J.W. (70) 145
Di Marco, R., see Nicoletti, F. (70) 87
Ding, M., see Carlson, C.D. (70) 181
Döpp, E.A., see Van der Laan, L.J.W. (70) 145
Douek, D.C., see Elliott, J.I. (70) 139
Droogan, A.G., see Crockard, A.D. (70) 29
Dubois Dalcq, M., see Voskuhl, R.R. (70) 103

Elliott, J.I., Douek, D.C. and Altmann, D.M.
Mice lacking $\alpha\beta^+$ T cells are resistant to the induction of experimental autoimmune encephalomyelitis (70) 139

Farris II, R.W., see Voskuhl, R.R. (70) 103
Finsen, B., see Dalmau, I. (70) 123

Galin, F.S., Zhou, S.-R., Whitaker, J.N. and Blalock, J.E.
Preferential association of Vλx light chains with γ2a heavy chains in naturally occurring human myelin basic protein reactive antibodies (70) 15
Gillen, C., see Jander, S. (70) 75
Gjata, B., see Lefaucheur, J.-P. (70) 37
González, B., see Dalmau, I. (70) 123
Good, M.F., see Pender, M.P. (70) 65

Handa, S., see Yuki, N. (70) 1
Hart, R.P., see Carlson, C.D. (70) 181
Hawkins, S.A., see Crockard, A.D. (70) 29
Hikawa, N. and Takenaka, T.
Sensory neurons regulate immunoglobulin secretion of spleen cells: cellular analysis of bidirectional communications between neurons and immune cells (70) 191
Houghten, R.A., see Pender, M.P. (70) 65
Hudson, S.J., Cai, J.-P., Thomas, V. and Chin, Y.-H.
Intracellular signaling of tumor necrosis factor-α in brain microvascular endothelial cells is mediated by a protein tyrosine kinase and protein kinase C-dependent pathway (70) 199

Ibrahim, M.Z.M., Reder, A.T., Lawand, R., Takash, W. and Sallouh-Khatib, S.
The mast cells of the multiple sclerosis brain (70) 131
Ignatowski, T.A., Chou, R.C. and Spengler, R.N.
Changes in noradrenergic sensitivity to tumor necrosis factor-α in brains of rats administered clonidine (70) 55

Jander, S., Pohl, J., Gillen, C., Schroeter, M. and Stoll, G.
Vascular cell adhesion molecule-1 mRNA is expressed in immune-mediated and ischemic injury of the rat nervous system (70) 75
Jonakait, G.M., see Carlson, C.D. (70) 181

Lacroix, S., Vallières, L. and Rivest, S.
C-*fos* mRNA pattern and corticotropin-releasing factor neuronal activity throughout the brain of rats injected centrally with a prostaglandin of E2 type (70) 163
Lafont, H., see Lefaucheur, J.-P. (70) 37
Lawand, R., see Ibrahim, M.Z.M. (70) 131
Lefaucheur, J.-P., Gjata, B., Lafont, H. and Sebille, A.
Angiogenic and inflammatory responses following skeletal muscle injury are altered by immune neutralization of endogenous basic fibroblast growth factor, insulin-like growth factor-1 and transforming growth factor-β1 (70) 37
Liaw, C., see Lovenberg, T.W. (70) 113
Liu, C., see Lovenberg, T.W. (70) 113
Liu, X.-J., see Lovenberg, T.W. (70) 113
Lodder, I.J., see Van der Laan, L.J.W. (70) 145
Lovenberg, T.W., Crowe, P.D., Liu, C., Chalmers, D.T., Liu, X.-J., Liaw, C., Clevenger, W., Oltersdorf, T., De Souza, E.B. and Maki, R.A.
Cloning of a cDNA encoding a novel interleukin-1 receptor related protein (IL1R-rp2) (70) 113

Maity, R., Mukherjee, R. and Skolnick, P.
Stereoselective inhibition of natural killer activity by the sigma ligand (+)-pentazocine (70) 7

Maki, R.A., see Lovenberg, T.W. (70) 113
Martiney, J.A., see Cuff, C.A. (70) 21
McCombe, P.A., Nickson, I., Tabi, Z. and Pender, M.P.
Corticosteroid treatment of experimental autoimmune encephalomyelitis in the Lewis rat results in loss of Vβ8.2$^+$ and myelin basic protein-reactive cells from the spinal cord, with increased total T-cell apoptosis but reduced apoptosis of Vβ8.2$^+$ cells (70) 93
McCombe, P.A., see Pender, M.P. (70) 65
McFarland, H.F., see Voskuhl, R.R. (70) 103
Minami, M., see Yamakuni, H. (70) 45
Mukherjee, R., see Maity, R. (70) 7

Nagasato, K., see Voskuhl, R.R. (70) 103
Nickson, I., see McCombe, P.A. (70) 93
Nicoletti, A., see Nicoletti, F. (70) 87
Nicoletti, F., Patti, F., Cocuzza, C., Zaccone, P., Nicoletti, A., Di Marco, R. and Reggio, A.
Elevated serum levels of interleukin-12 in chronic progressive multiple sclerosis (70) 87

Oltersdorf, T., see Lovenberg, T.W. (70) 113

Patti, F., see Nicoletti, F. (70) 87
Pedersen, E.B., see Dalmau, I. (70) 123
Pender, M.P., Csurhes, P.A., Houghten, R.A., McCombe, P.A. and Good, M.F.
A study of human T-cell lines generated from multiple sclerosis patients and controls by stimulation with peptides of myelin basic protein (70) 65
Pender, M.P., see McCombe, P.A. (70) 93
Pohl, J., see Jander, S. (70) 75

Reder, A.T., see Ibrahim, M.Z.M. (70) 131
Reggio, A., see Nicoletti, F. (70) 87
Reichert, F. and Rotshenker, S.
Deficient activation of microglia during optic nerve degeneration (70) 153
Rivest, S., see Lacroix, S. (70) 163
Rotshenker, S., see Reichert, F. (70) 153
Ruuls, S.R., see Van der Laan, L.J.W. (70) 145

Sallouh-Khatib, S., see Ibrahim, M.Z.M. (70) 131
Satoh, M., see Yamakuni, H. (70) 45
Schreiber, G., see Avissar, S. (70) 81
Schroeter, M., see Jander, S. (70) 75
Sebille, A., see Lefaucheur, J.-P. (70) 37
Skolnick, P., see Maity, R. (70) 7
Spengler, R.N., see Ignatowski, T.A. (70) 55
Stoll, G., see Jander, S. (70) 75

Tabi, Z., see McCombe, P.A. (70) 93
Tagawa, Y., see Yuki, N. (70) 1
Takash, W., see Ibrahim, M.Z.M. (70) 131
Takenaka, T., see Hikawa, N. (70) 191
Thomas, V., see Hudson, S.J. (70) 199
Treacy, M.T., see Crockard, A.D. (70) 29

Vallières, L., see Lacroix, S. (70) 163
Van der Laan, L.J.W., Ruuls, S.R., Weber, K.S., Lodder, I.J., Döpp, E.A. and Dijkstra, C.D.
Macrophage phagocytosis of myelin in vitro determined by flow cytometry: phagocytosis is mediated by CR3 and induces production of tumor necrosis factor-α and nitric oxide (70) 145
Voskuhl, R.R., Farris II, R.W., Nagasato, K., McFarland, H.F. and Dubois Dalcq, M.
Epitope spreading occurs in active but not passive EAE induced by myelin basic protein (70) 103

Weber, K.S., see Van der Laan, L.J.W. (70) 145
Whitaker, J.N., see Galin, F.S. (70) 15

Yamakuni, H., Minami, M. and Satoh, M.
Localization of mRNA for leukemia inhibitory factor receptor in the adult rat brain (70) 45
Yuki, N., Tagawa, Y. and Handa, S.
Autoantibodies to peripheral nerve glycosphingolipids SPG, SLPG, and SGPG in Guillain–Barré syndrome and chronic inflammatory demyelinating polyneuropathy (70) 1

Zaccone, P., see Nicoletti, F. (70) 87
Zhou, S.-R., see Galin, F.S. (70) 15
Zimmer, J., see Dalmau, I. (70) 123

Journal of Neuroimmunology 70 (1996) 211–215

Journal of Neuroimmunology

Subject Index (Vol. 70)

Adrenergic
Tumor necrosis factor; Hippocampus; Clonidine; Brain (Ignatowski, T.A. (70) 55)

Antibodies
Experimental allergic encephalomyelitis; B-lymphocytes; Autoimmunity; Multiple sclerosis (Galin, F.S. (70) 15)

Apoptosis
Corticosteroids; Experimental autoimmune encephalomyelitis; Multiple sclerosis; Recovery; T-lymphocytes (McCombe, P.A. (70) 93)

Autoantibody
Guillain–Barré syndrome; Chronic inflammatory demyelinating polyneuropathy; Peripheral nerve; Glycosphingolipid (Yuki, N. (70) 1)

Autoimmune diseases
Cytokines; Experimental allergic encephalomyelitis interleukin-12; Multiple sclerosis (Nicoletti, F. (70) 87)

Autoimmunity
Experimental allergic encephalomyelitis; B-lymphocytes; Antibodies; Multiple sclerosis (Galin, F.S. (70) 15)

Axotomy
Leukemia inhibitory factor; Interleukin-1; Interleukin-1 receptor; Sympathetic ganglia; Dexamethasone; Substance P; Superior cervical ganglia (Carlson, C.D. (70) 181)

β-adrenergic
G proteins; Muscarinic; Dopamine receptors; Mononuclear leucocytes (Avissar, S. (70) 81)

Basic fibroblast growth factor
Insulin-like growth factor-1; Transforming growth factor-β1; Endothelial cell; Macrophage; Mast cell (Lefaucheur, J.-P. (70) 37)

dB–cAMP
Cell cultures; Microglia; Nucleoside diphosphatase; OX42; Glial fibrillary acidic protein (Dalmau, I. (70) 123)

Blood-retina barrier
Interleukin-1; Transforming growth factor β; Inflammation; Vascular permeability; Rabbit (Cuff, C.A. (70) 21)

B-lymphocytes
Experimental allergic encephalomyelitis; Autoimmunity; Antibodies; Multiple sclerosis (Galin, F.S. (70) 15)

Brain
Tumor necrosis factor; Adrenergic; Hippocampus; Clonidine (Ignatowski, T.A. (70) 55)

Interleukin-1 receptor (Lovenberg, T.W. (70) 113)

Brain microvascular endothelial cells
Signal transduction; Tumor necrosis factor-α (Hudson, S.J. (70) 199)

Cell cultures
dB–cAMP; Microglia; Nucleoside diphosphatase; OX42; Glial fibrillary acidic protein (Dalmau, I. (70) 123)

Cerebral ischemia
In situ hybridization; Endothelium; Macrophage; Wallerian degeneration; Experimental autoimmune encephalomyelitis; Experimental autoimmune neuritis (Jander, S. (70) 75)

c-*fos*
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Immune response; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

Cholinergic differentiation factor
Leukemia inhibitory factor; Receptor; In situ hybridization; Rat (Yamakuni, H. (70) 45)

Chronic inflammatory demyelinating polyneuropathy
Guillain–Barré syndrome; Autoantibody; Peripheral nerve; Glycosphingolipid (Yuki, N. (70) 1)

Clonidine
Tumor necrosis factor; Adrenergic; Hippocampus; Brain (Ignatowski, T.A. (70) 55)

Corticosteroids
Apoptosis; Experimental autoimmune encephalomyelitis; Multiple sclerosis; Recovery; T-lymphocytes (McCombe, P.A. (70) 93)

Corticotropin-releasing factor
Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Immune response; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

Corticotropin-releasing factor receptor
Corticotropin-releasing factor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Immune response; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

CR3
Demyelination; Macrophage; Myelin; Flow cytometry; Ingestion (Van der Laan, L.J.W. (70) 145)

Cryptic epitope
Isoform; Multiple sclerosis; Myelin basic protein; Peptide; T-cell (Pender, M.P. (70) 65)

Cytokines
Autoimmune diseases; Experimental allergic encephalomyelitis interleukin-12; Multiple sclerosis (Nicoletti, F. (70) 87)

Demyelination
Macrophage; Myelin; Flow cytometry; Ingestion; CR3 (Van der Laan, L.J.W. (70) 145)

Dexamethasone
Leukemia inhibitory factor; Interleukin-1; Interleukin-1 receptor; Sympathetic ganglia; Axotomy; Substance P; Superior cervical ganglia (Carlson, C.D. (70) 181)

Dopamine receptors
G proteins; β-adrenergic; Muscarinic; Mononuclear leucocytes (Avissar, S. (70) 81)

DRG neuron
Neurokinin A; Vasoactive intestinal peptide; Neuropeptides; Neuroimmunology (Hikawa, N. (70) 191)

Endothelial cell
Basic fibroblast growth factor; Insulin-like growth factor-1; Transforming growth factor-β1; Macrophage; Mast cell (Lefaucheur, J.-P. (70) 37)

Endothelium
In situ hybridization; Macrophage; Wallerian degeneration; Experimental autoimmune encephalomyelitis; Experimental autoimmune neuritis; Cerebral ischemia (Jander, S. (70) 75)

Epitope spreading
Myelin basic protein; Proteolipid protein; T lymphocyte; Experimental allergic encephalomyelitis (Voskuhl, R.R. (70) 103)

Experimental allergic encephalomyelitis
B-lymphocytes; Autoimmunity; Antibodies; Multiple sclerosis (Galin, F.S. (70) 15)

Epitope spreading; Myelin basic protein; Proteolipid protein; T lymphocyte (Voskuhl, R.R. (70) 103)

Experimental allergic encephalomyelitis interleukin-12
Autoimmune diseases; Cytokines; Multiple sclerosis (Nicoletti, F. (70) 87)

Experimental autoimmune encephalomyelitis
In situ hybridization; Endothelium; Macrophage; Wallerian degeneration; Experimental autoimmune neuritis; Cerebral ischemia (Jander, S. (70) 75)

Apoptosis; Corticosteroids; Multiple sclerosis; Recovery; T-lymphocytes (McCombe, P.A. (70) 93)

$\gamma\delta$-T cells; $\alpha\beta$-T cells (Elliott, J.I. (70) 139)

Experimental autoimmune neuritis
In situ hybridization; Endothelium; Macrophage; Wallerian degeneration; Experimental autoimmune encephalomyelitis; Cerebral ischemia (Jander, S. (70) 75)

Flow cytometry
Demyelination; Macrophage; Myelin; Ingestion; CR3 (Van der Laan, L.J.W. (70) 145)

Glial fibrillary acidic protein
Cell cultures; dB–cAMP; Microglia; Nucleoside diphosphatase; OX42 (Dalmau, I. (70) 123)

Glycosphingolipid
Guillain–Barré syndrome; Chronic inflammatory demyelinating polyneuropathy; Autoantibody; Peripheral nerve (Yuki, N. (70) 1)

G proteins
β-adrenergic; Muscarinic; Dopamine receptors; Mononuclear leucocytes (Avissar, S. (70) 81)

Guillain–Barré syndrome
Chronic inflammatory demyelinating polyneuropathy; Autoantibody; Peripheral nerve; Glycosphingolipid (Yuki, N. (70) 1)

Hippocampus
Tumor necrosis factor; Adrenergic; Clonidine; Brain (Ignatowski, T.A. (70) 55)

HLA-DR
Interferon-β; Methylprednisolone; Monocytes; Multiple sclerosis (Crockard, A.D. (70) 29)

Hypothalamic–pituitary–adrenal axis
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Immune response; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

IgE
Multiple sclerosis; Mast cells; Tryptase (Ibrahim, M.Z.M. (70) 131)

Immediate *early* genes
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Immune response; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

Immune response
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

Immunocytochemistry
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Intronic probe technology; Immune response; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

Inflammation
Interleukin-1; Transforming growth factor β; Blood-retina barrier; Vascular permeability; Rabbit (Cuff, C.A. (70) 21)

Ingestion
Demyelination; Macrophage; Myelin; Flow cytometry; CR3 (Van der Laan, L.J.W. (70) 145)

In situ hybridization
Leukemia inhibitory factor; Cholinergic differentiation factor; Receptor; Rat (Yamakuni, H. (70) 45)

Endothelium; Macrophage; Wallerian degeneration; Experimental autoimmune encephalomyelitis; Experimental autoimmune neuritis; Cerebral ischemia (Jander, S. (70) 75)

In situ hybridization histochemistry
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; Immunocytochemistry; Intronic probe technology; Immune response; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

Insulin-like growth factor-1
Basic fibroblast growth factor; Transforming growth factor-β1; Endothelial cell; Macrophage; Mast cell (Lefaucheur, J.-P. (70) 37)

Interferon-β
HLA-DR; Methylprednisolone; Monocytes; Multiple sclerosis (Crockard, A.D. (70) 29)

Interleukin-1
Transforming growth factor β; Inflammation; Blood-retina barrier; Vascular permeability; Rabbit (Cuff, C.A. (70) 21)

Leukemia inhibitory factor; Interleukin-1 receptor; Sympathetic ganglia; Axotomy; Dexamethasone; Substance P; Superior cervical ganglia (Carlson, C.D. (70) 181)

Interleukin-1 receptor
Brain (Lovenberg, T.W. (70) 113)

Leukemia inhibitory factor; Interleukin-1; Sympathetic ganglia; Axotomy; Dexamethasone; Substance P; Superior cervical ganglia (Carlson, C.D. (70) 181)

Intronic probe technology
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Immune response; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

Isoform
Cryptic epitope; Multiple sclerosis; Myelin basic protein; Peptide; T-cell (Pender, M.P. (70) 65)

Leukemia inhibitory factor
Cholinergic differentiation factor; Receptor; In situ hybridization; Rat (Yamakuni, H. (70) 45)

Interleukin-1; Interleukin-1 receptor; Sympathetic ganglia; Axotomy; Dexamethasone; Substance P; Superior cervical ganglia (Carlson, C.D. (70) 181)

MAC-2
Optic nerve; Wallerian degeneration; Nerve regeneration; Microglia; Macrophage; Myelin (Reichert, F. (70) 153)

Macrophage
Basic fibroblast growth factor; Insulin-like growth factor-1; Transforming growth factor-β1; Endothelial cell; Mast cell (Lefaucheur, J.-P. (70) 37)

In situ hybridization; Endothelium; Wallerian degeneration; Experimental autoimmune encephalomyelitis; Experimental autoimmune neuritis; Cerebral ischemia (Jander, S. (70) 75)

Demyelination; Myelin; Flow cytometry; Ingestion; CR3 (Van der Laan, L.J.W. (70) 145)

Optic nerve; Wallerian degeneration; Nerve regeneration; Microglia; Myelin; MAC-2 (Reichert, F. (70) 153)

Male rats
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Immune response; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

Mast cell
Basic fibroblast growth factor; Insulin-like growth factor-1; Transforming growth factor-β1; Endothelial cell; Macrophage (Lefaucheur, J.-P. (70) 37)

Multiple sclerosis; IgE; Tryptase (Ibrahim, M.Z.M. (70) 131)

Methylprednisolone
HLA-DR; Interferon-β; Monocytes; Multiple sclerosis (Crockard, A.D. (70) 29)

Microglia
Cell cultures; dB–cAMP; Nucleoside diphosphatase; OX42; Glial fibrillary acidic protein (Dalmau, I. (70) 123)

Optic nerve; Wallerian degeneration; Nerve regeneration; Macrophage; Myelin; MAC-2 (Reichert, F. (70) 153)

Monocytes
HLA-DR; Interferon-β; Methylprednisolone; Multiple sclerosis (Crockard, A.D. (70) 29)

Mononuclear leucocytes
G proteins; β-adrenergic; Muscarinic; Dopamine receptors (Avissar, S. (70) 81)

Multiple sclerosis
Experimental allergic encephalomyelitis; B-lymphocytes; Autoimmunity; Antibodies (Galin, F.S. (70) 15)

HLA-DR; Interferon-β; Methylprednisolone; Monocytes (Crockard, A.D. (70) 29)

Cryptic epitope; Isoform; Myelin basic protein; Peptide; T-cell (Pender, M.P. (70) 65)

Autoimmune diseases; Cytokines; Experimental allergic encephalomyelitis interleukin-12 (Nicoletti, F. (70) 87)

Apoptosis; Corticosteroids; Experimental autoimmune encephalomyelitis; Recovery; T-lymphocytes (McCombe, P.A. (70) 93)

Mast cells; IgE; Tryptase (Ibrahim, M.Z.M. (70) 131)

Muscarinic
G proteins; β-adrenergic; Dopamine receptors; Mononuclear leucocytes (Avissar, S. (70) 81)

Myelin
Demyelination; Macrophage; Flow cytometry; Ingestion; CR3 (Van der Laan, L.J.W. (70) 145)

Optic nerve; Wallerian degeneration; Nerve regeneration; Microglia; Macrophage; MAC-2 (Reichert, F. (70) 153)

Myelin basic protein
Cryptic epitope; Isoform; Multiple sclerosis; Peptide; T-cell (Pender, M.P. (70) 65)

Epitope spreading; Proteolipid protein; T lymphocyte; Experimental allergic encephalomyelitis (Voskuhl, R.R. (70) 103)

Nerve regeneration
Optic nerve; Wallerian degeneration; Microglia; Macrophage; Myelin; MAC-2 (Reichert, F. (70) 153)

Neuroendocrinology
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Immune response; Male rats; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

Neuroimmunology
DRG neuron; Neurokinin A; Vasoactive intestinal peptide; Neuropeptides (Hikawa, N. (70) 191)

Neurokinin A
DRG neuron; Vasoactive intestinal peptide; Neuropeptides; Neuroimmunology (Hikawa, N. (70) 191)

Neuropeptides
DRG neuron; Neurokinin A; Vasoactive intestinal peptide; Neuroimmunology (Hikawa, N. (70) 191)

NK cell activity
Sigma receptors; Pentazocine; Splenocyte (Maity, R. (70) 7)

Nucleoside diphosphatase
Cell cultures; dB–cAMP; Microglia; OX42; Glial fibrillary acidic protein (Dalmau, I. (70) 123)

Optic nerve
Wallerian degeneration; Nerve regeneration; Microglia; Macrophage; Myelin; MAC-2 (Reichert, F. (70) 153)

OX42
Cell cultures; dB–cAMP; Microglia; Nucleoside diphosphatase; Glial fibrillary acidic protein (Dalmau, I. (70) 123)

Oxytocin
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Immune response; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Vasopressin (Lacroix, S. (70) 163)

Paraventricular nucleus of the hypothalamus
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Immune response; Male rats; Neuroendocrinology; Supraoptic nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

Pentazocine
Sigma receptors; NK cell activity; Splenocyte (Maity, R. (70) 7)

Peptide
Cryptic epitope; Isoform; Multiple sclerosis; Myelin basic protein; T-cell (Pender, M.P. (70) 65)

Peripheral nerve
Guillain–Barré syndrome; Chronic inflammatory demyelinating polyneuropathy; Autoantibody; Glycosphingolipid (Yuki, N. (70) 1)

Proteolipid protein
Epitope spreading; Myelin basic protein; T lymphocyte; Experimental allergic encephalomyelitis (Voskuhl, R.R. (70) 103)

Rabbit
Interleukin-1; Transforming growth factor β; Inflammation; Blood-retina barrier; Vascular permeability (Cuff, C.A. (70) 21)

Rat
Leukemia inhibitory factor; Cholinergic differentiation factor; Receptor; In situ hybridization (Yamakuni, H. (70) 45)

Receptor
Leukemia inhibitory factor; Cholinergic differentiation factor; In situ hybridization; Rat (Yamakuni, H. (70) 45)

Recovery
Apoptosis; Corticosteroids; Experimental autoimmune encephalomyelitis; Multiple sclerosis; T-lymphocytes (McCombe, P.A. (70) 93)

Sigma receptors
Pentazocine; NK cell activity; Splenocyte (Maity, R. (70) 7)

Signal transduction
Tumor necrosis factor-α; Brain microvascular endothelial cells (Hudson, S.J. (70) 199)

Splenocyte
Sigma receptors; Pentazocine; NK cell activity (Maity, R. (70) 7)

Substance P
Leukemia inhibitory factor; Interleukin-1; Interleukin-1 receptor; Sympathetic ganglia; Axotomy; Dexamethasone; Superior cervical ganglia (Carlson, C.D. (70) 181)

Superior cervical ganglia
Leukemia inhibitory factor; Interleukin-1; Interleukin-1 receptor; Sympathetic ganglia; Axotomy; Dexamethasone; Substance P (Carlson, C.D. (70) 181)

Supraoptic nucleus of the hypothalamus
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Immune response; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Vasopressin; Oxytocin (Lacroix, S. (70) 163)

Sympathetic ganglia
Leukemia inhibitory factor; Interleukin-1; Interleukin-1 receptor; Axotomy; Dexamethasone; Substance P; Superior cervical ganglia (Carlson, C.D. (70) 181)

T-cell
Cryptic epitope; Isoform; Multiple sclerosis; Myelin basic protein; Peptide (Pender, M.P. (70) 65)

$\alpha\beta$-T cells
Experimental autoimmune encephalomyelitis; $\gamma\delta$-T cells (Elliott, J.I. (70) 139)

$\gamma\delta$-T cells
Experimental autoimmune encephalomyelitis; $\alpha\beta$-T cells (Elliott, J.I. (70) 139)

T-lymphocytes
Apoptosis; Corticosteroids; Experimental autoimmune encephalomyelitis; Multiple sclerosis; Recovery (McCombe, P.A. (70) 93)

Epitope spreading; Myelin basic protein; Proteolipid protein; Experimental allergic encephalomyelitis (Voskuhl, R.R. (70) 103)

Transforming growth factor β
Interleukin-1; Inflammation; Blood-retina barrier; Vascular permeability; Rabbit (Cuff, C.A. (70) 21)

Transforming growth factor-β1
Basic fibroblast growth factor; Insulin-like growth factor-1; Endothelial cell; Macrophage; Mast cell (Lefaucheur, J.-P. (70) 37)

Tryptase
Multiple sclerosis; Mast cells; IgE (Ibrahim, M.Z.M. (70) 131)

Tumor necrosis factor
Adrenergic; Hippocampus; Clonidine; Brain (Ignatowski, T.A. (70) 55)

Tumor necrosis factor-α
Signal transduction; Brain microvascular endothelial cells (Hudson, S.J. (70) 199)

Vascular permeability
Interleukin-1; Transforming growth factor β; Inflammation; Blood-retina barrier; Rabbit (Cuff, C.A. (70) 21)

Vasoactive intestinal peptide
DRG neuron; Neurokinin A; Neuropeptides; Neuroimmunology (Hikawa, N. (70) 191)

Vasopressin
Corticotropin-releasing factor; Corticotropin-releasing factor receptor; c-*fos*; Hypothalamic–pituitary–adrenal axis; Immediate *early* genes; In situ hybridization histochemistry; Immunocytochemistry; Intronic probe technology; Immune response; Male rats; Neuroendocrinology; Paraventricular nucleus of the hypothalamus; Supraoptic nucleus of the hypothalamus; Oxytocin (Lacroix, S. (70) 163)

Wallerian degeneration
In situ hybridization; Endothelium; Macrophage; Experimental autoimmune encephalomyelitis; Experimental autoimmune neuritis; Cerebral ischemia (Jander, S. (70) 75)

Optic nerve; Nerve regeneration; Microglia; Macrophage; Myelin; MAC-2 (Reichert, F. (70) 153)
